

Baby saved. No insurance. Hospital still recovered \$136,718.

Sometimes, the most satisfying work is also the most financially rewarding

On a rainy August evening, a young mother-to-be was driving home from her baby shower, when the unthinkable happened. She lost control and slammed head-on into a tree.

Emergency vehicles found the mother and unborn infant in critical condition. Mother and child were rushed to the nearest trauma center, where an emergency c-section was performed.

It was successful, but the resulting hospital bill, and thousands in ancillary charges added up to \$136,717.97.

There was no private insurance.

Advanced Patient Advocacy—*The Patient's Advocate*[™] was able to secure

government benefits to offset the full amount of the bill.

In the process, when initial benefits were denied due to accounting errors by the government, we also acted as the family's representative in front of the local Medical Assistance bureau and appeals committees.

This is just one of many circumstances in which Advanced Patient Advocacy has helped families survive the pain of medical emergencies.

What makes APA so different? Simple. Advocacy is our only mission. Period.

We spend whatever time is necessary to work every case to make sure it never has to go to collections or bad debt. For us, it's not just business. It's personal.

Our competitors say we care too much. Our hospitals say they've never seen more stunning recovery. Call us for details.

Discover the difference and the enormous benefits your hospital's A/R will gain when you approach eligibility from a different perspective— from the heart of an advocate.
